

2021

# TOP 5 Key Takeaways

## CISO Survival Guide

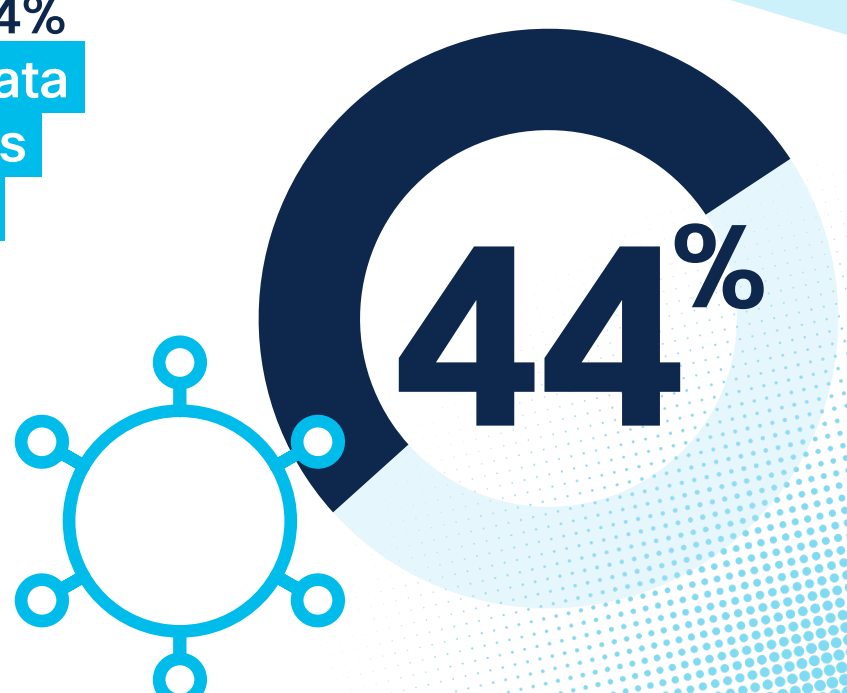

1. While Secure Access Service Edge (SASE) is still early in its adoption lifecycle, almost all respondents (98%) see clear benefits and are directing future spend towards it.

2. Among SASE themes, Zero Trust Network Access (ZTNA) and Cloud-Native Firewalls are key priorities.

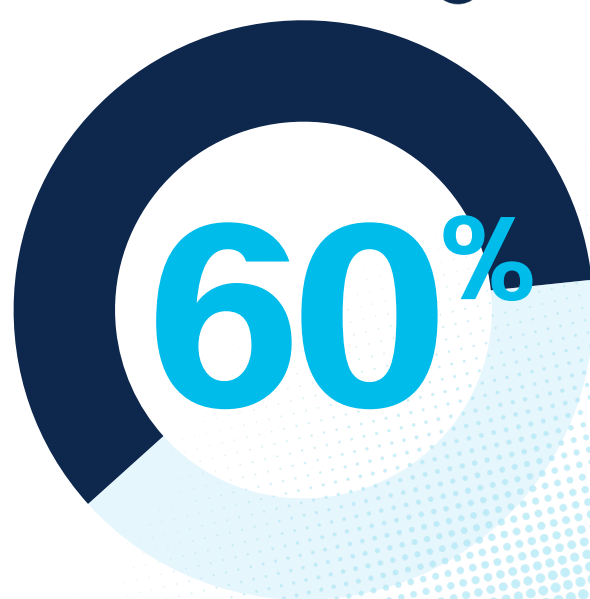

3. According to our recent survey, 44% of CISOs have data access control as their #1 focus in privacy and compliance.

4. When it comes to DevSecOps, it's not about "shifting left" anymore, but about "shift everywhere." Being secure requires visibility and policy controls throughout the DevOps lifecycle.

5. More than half (60%) of CISOs believe network assets (including ephemeral) are most difficult to inventory. Applications, Data, Endpoints and User Privileges remain unsolved Shadow IT.
