

Unlocking the Power of Data

Cohesity and Cisco

Joe Tarantino, VP West Sales

April 2019

In collaboration with

COHESITY

About Cohesity

Redefining Secondary Data & Applications

Phenomenal Pedigree

- Founded in 2013 by Mohit Aron, co-founder of Nutanix, lead on Google File System
- Experienced team from Nutanix, Google, VMware, EMC, NetApp
- 300% Revenue growth YoY, 70% Enterprise customers

Data management is a key business driver

The storage, management, security and usage of a company's proprietary data has become a mission critical element of any enterprise

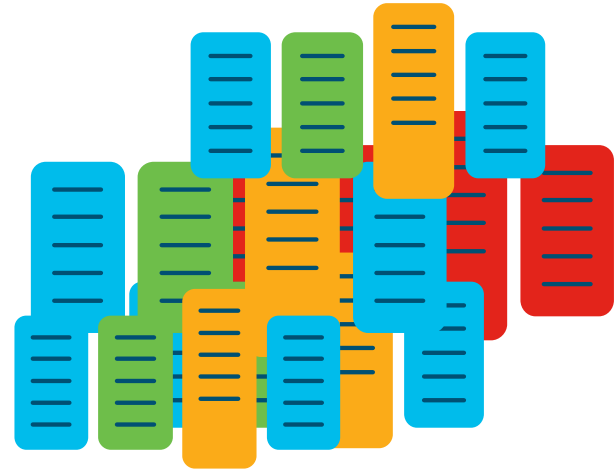

80% of enterprise data is considered secondary

Backups, archives, files, objects and even analytics. The challenge does not however lie in the sheer core of the data itself. Instead it lies in the ability to access and use it.

Legacy data storage products are siloed and inefficient

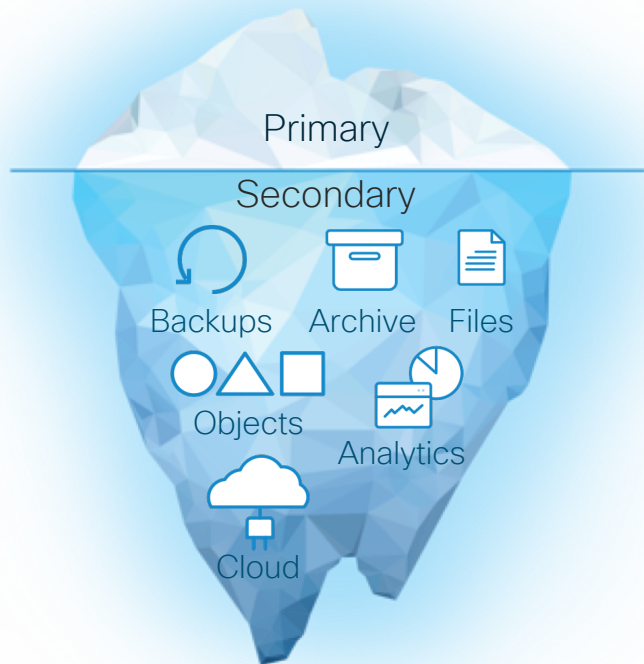

- Have been built over time
- Using a myriad of technologies and vendors

In today's ever-changing and growing world of data, this approach can be costly and ineffective

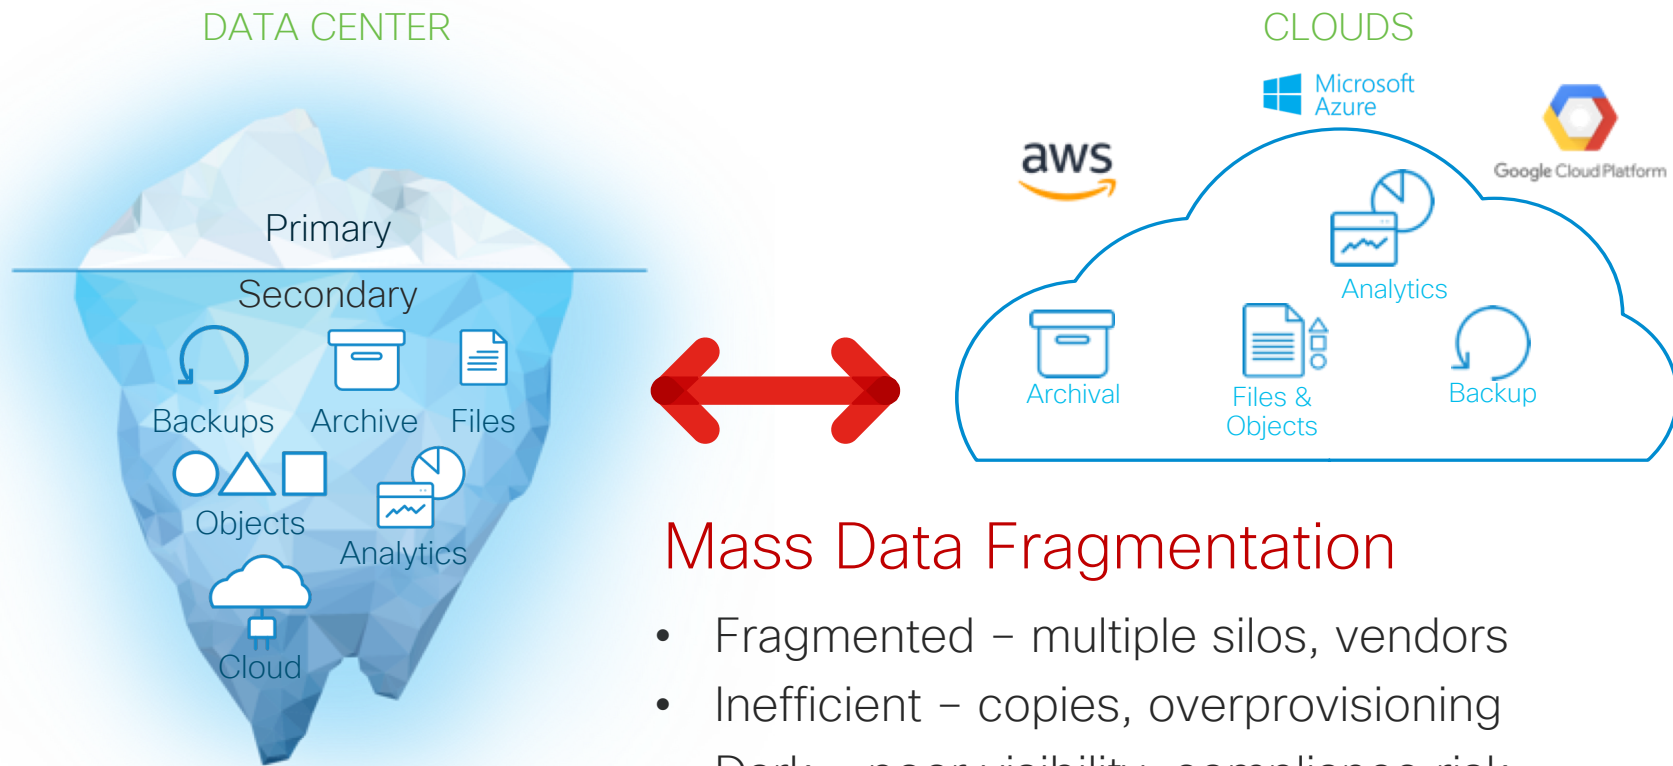

Complex secondary data infrastructure

DATA CENTER

- Fragmented – multiple silos, vendors
- Inefficient – copies, overprovisioning
- Dark – poor visibility, compliance risk

Similar complexity is growing in the cloud

Mass Data Fragmentation

- Fragmented – multiple silos, vendors
- Inefficient – copies, overprovisioning
- Dark – poor visibility, compliance risk

New data challenges require a new storage approach

Future-proof the
business

Manage backup &
recovery

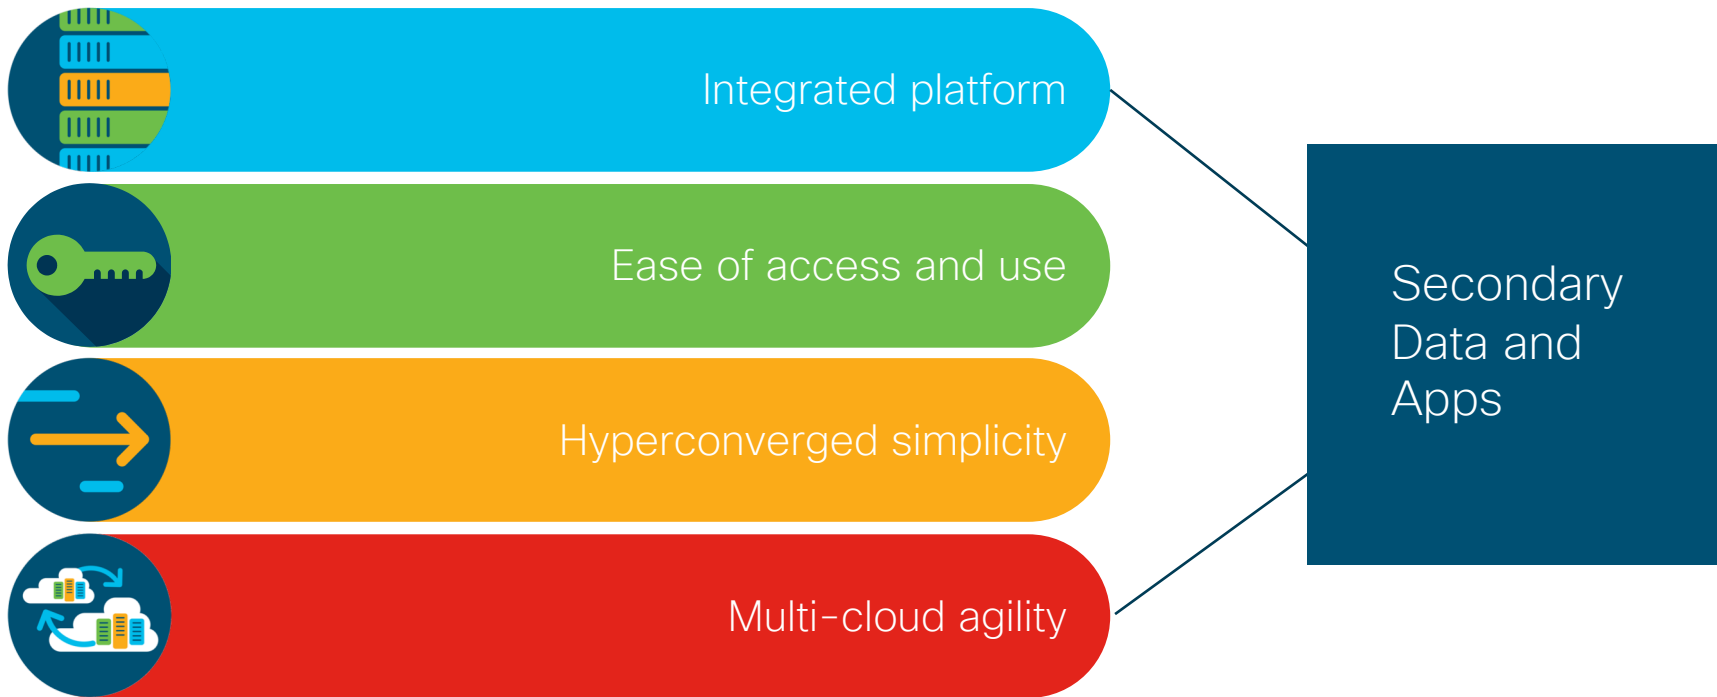

Handle data growth

Reduce costs,
complexity and
security risks

Cohesity Data Platform Consolidates Secondary Data and Apps

It's time to modernize data center operations

Cohesity data platform

Web-scale simplicity for secondary data

End-to-end data protection, archiving
and instant recovery

The only hyperconverged, web-scale
platform for all secondary data and apps

Native public cloud integration &
unified management

Cisco UCS® and Hyperflex™

Unites compute, network, storage and
virtualization

Scale, agility and integration

Multi-cloud hyperconverged
infrastructure

Scales and supports all
applications

Cisco and Cohesity simplified platforms deliver

Management of primary
and secondary workloads

Agile web-scale solution
for on prem & cloud

Unmatched
scalability

Frictionless mobility to
data & applications

Simplify the entire data stack for both primary *and* secondary data into an architecture, unlocking amazing new opportunities

Questions?

Let's schedule some time with Cisco and Cohesity to discuss how you can meet your data storage needs today and tomorrow.
