

The Next Decade of Data

How Analytics and AI are Shaping
Your Business

NOAH YAGO, Director Cisco Investments
Big Data Domain Leader

Data: An Analogy of Corn

2011

Established
Our Data & Analytics Domain

TODAY

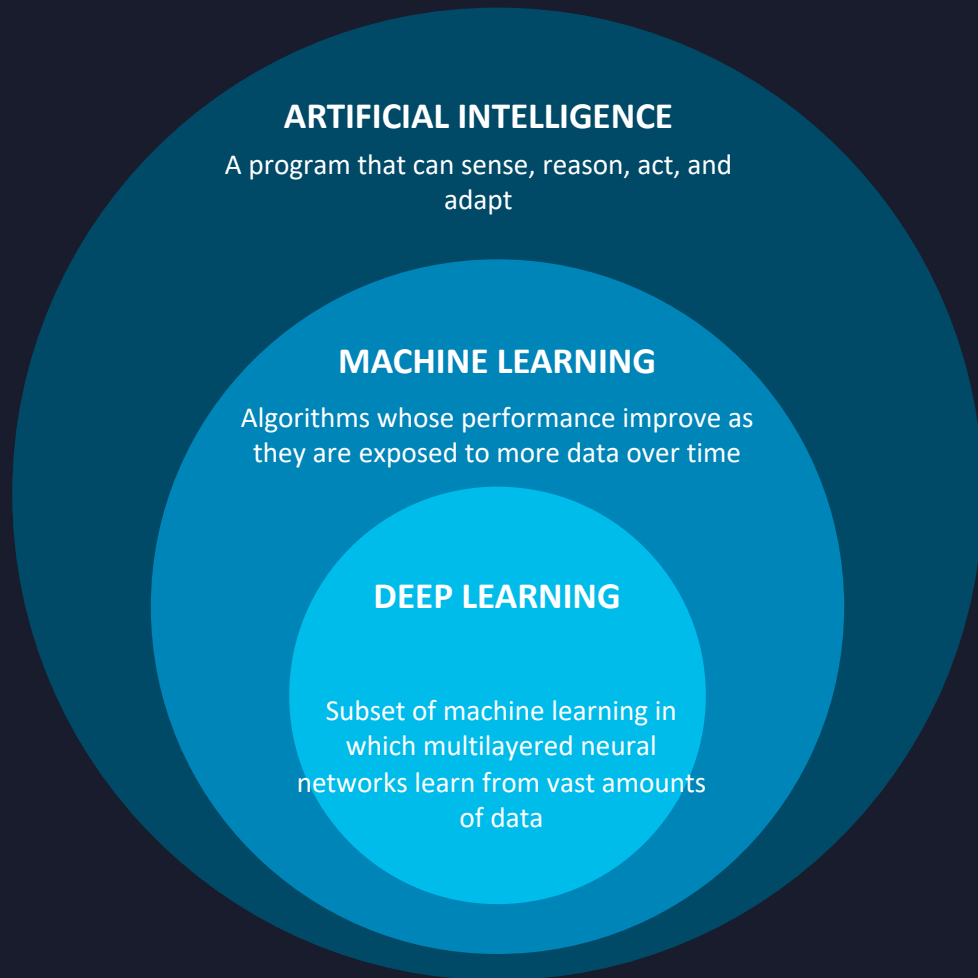

More Relevant
Than Ever Before

Key Drivers

Digital transformation | Cloud adoption | AI & ML

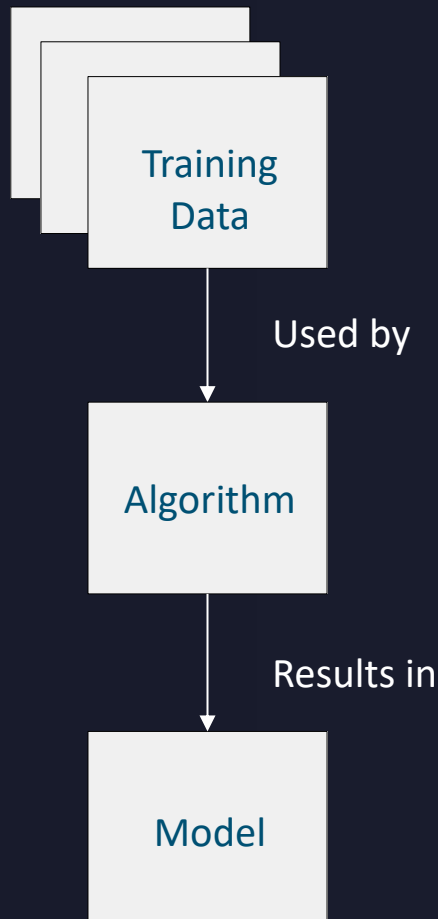

Expanded universe of buyers | Automation | Decoupling of storage, network, & compute

Defining the Space.

AI & ML

Redefining how customers
approach business problems

AI & ML Implementation

Key Challenges

Deploying on Enterprise Grade Infrastructure

Deep learning, training, inference
& test/dev

Connecting with Data Sources

Unstructured data lakes &
structured data arrays

Taming the Software Frameworks

Open source & proprietary
Rapidly iterating
Numerous & fragmented

Market Segmentation

Plumbing

Basic building blocks

Processing

Organization, access, transport

Output

Insights and actions

Industry Verticals

Specific enterprise functions

big data = compiling & processing data, deriving insights & taking action

2017-18

Data Stack Migrating to Cloud

Big Data – Speeding Up

Buying Center Expansion

✗ Stack is Maturing

✗ AI/ML/Deep Learning

✗ Open Source Model

**New Developments
(Fresh for 2019!)**

2019

Data Stack Migrating to Cloud

Cambrian Data Explosion
(volume, formats, speed, gravity)

Buying Center Expansion

“Data Age” Biz Models

Blurred (IT Ops) Lines

Process Streamlining

AI/ML/Deep Learning ... Peak Oil?

Notable VC Rounds

2016	
Voyager Labs	\$100M
Snowflake	\$79M
C3 IoT	\$70M
ThoughtSpot	\$64M
Databricks	\$60M
MapR	\$51M
Looker	\$48M
Neo Technology	\$36M
MemSQL	\$36M
DataRobot	\$33M
Total	\$577M

2017	
Databricks	\$140M
Snowflake	\$105M
Petuum	\$93M
Looker	\$82M
DataRobot	\$67M
MapR	\$61M
ThoughtSpot	\$60M
Confluent	\$50M
Feedzai	\$50M
InsideSales.com	\$50M
Total	\$758M

2018 – 2019 YTD ⁽¹⁾	
Snowflake	\$713M
Automation Anywhere	\$550M
Dataminr	\$392M
Databricks	\$255M
ThoughtSpot	\$145M
Confluent	\$125M
C3 IoT	\$106M
Looker	\$103M
Dataiku	\$100M
DataRobot	\$100M
Total	\$2.6B

1) 2019 YTD up until 1/31/2019.

Investment Portfolio

Developer of a ML automation platform designed to deploy predictive models

Provides a data fabric to connect various data sources, eliminating complex data warehousing solutions

Enterprise-grade, big data platform that supports mission-critical and real-time production uses

M&A

2019 Industry Trends

Big Data & Analytics

Data Stack Migrating to Cloud

Adoption maturing & new architectures

Cambrian Data Explosion
(volume, formats, speed, gravity)

Decoupled, cheaper & ubiquitous data → faster, less structured, more scalable

Buying Center Expansion

Emphasis on newer stakeholders (developers and less-technical users) vs. core IT buyers

“Data Age” Biz Models

Data as a formal business area (rise of the CDO); newer pricing and delivery models (self-service)

Blurred (IT Ops) Lines

IT as business enabler (vs. cost center) prompting segment-wide land grab

Process Streamlining

AI/ML driven manual processes automation

AI/ML/Deep Learning

- AI/ML/DL becoming embedded tech vs. standalone businesses
- Proliferation of machine data creating new opportunities
- Fundamental platforms and innovation driven by technology leaders:
 - Tensorflow (Google)
 - Watson (IBM)
 - MXNet (Amazon)

Global AI Spend⁽¹⁾

TAM growth: 64% YoY '17-22

Enablement Areas

- Predictive analytics
- Workbench
- Scale enablers

Big Tech - AI/ML Related Activity

Products

- TensorFlow
- Smart Reply
- Voice Search
- DeepMind
- Artificial Brain

M&A: API.ai, Moodstocks, Timeful, DNNresearch, Cleversense, Emu, DeepMind, Jetpac, Dark Blue Labs, Vision Factory

Products

- Alexa, Echo
- Alexa Skills Kit
- Amazon ML

M&A: Angel.ai, Evi, Orbeus, Safaba, Kiva.
Has an Alexa Fund focused on voice and AI startups

Products

- IBM Watson

M&A: Cogenea, AlchemyAPI, Explorys

Products

- Cortana, Tay
- Microsoft Bot Framework
- Azure ML

M&A: SwiftKey, Aorata, Netbreeze, Equivio, Genee

Products

- Intel® Math Kernel Library, Intel Deep Learning SDK
- Xeon chips for AI

M&A: Itseez, Nervana, Saffron, Movidius

Products

- Einstein

M&A: TempoAI, PredictionIO, MetaMind

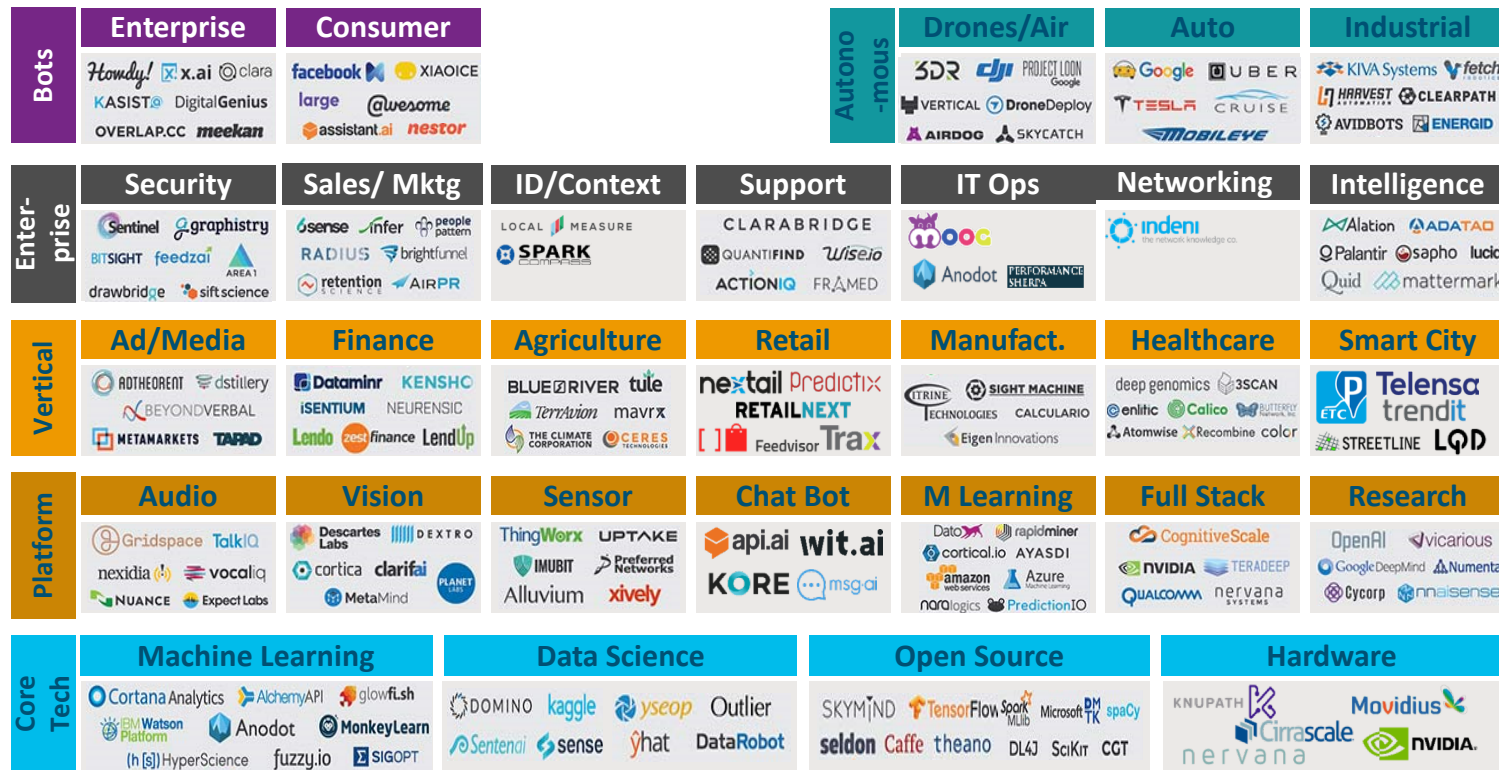

Products

- Facebook M bot
- Automatic Alternative Text
- Facebook AI Research Lab

M&A: Wit.AI, Surreal Vision, Face.com

AI/ML Market Landscape

Vertical/ End Use Case-focused

New data sources

or

Predictions using existing data

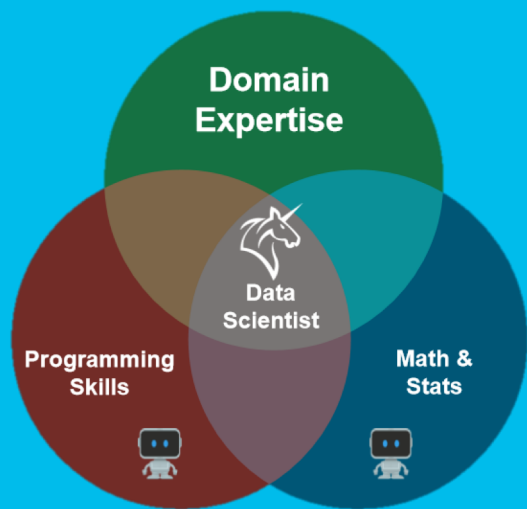

or

Intelligent automation

Horizontal Building Blocks/ Developer-focused

Tools targeted at developers looking to integrate AI technology into their applications

Predictive Models & ML Drivers

Scaling Data Scientists

Finite supply of data scientists & time spent “tooling”

Automation Technology – Actioning

Automates the math & stats along with the programming skills portion of data science

Empowering Business Analysts

Buyer center expansion

Case Study: Perspica acquisition

Metric Ingest Scalability for Larger Customer Opportunities

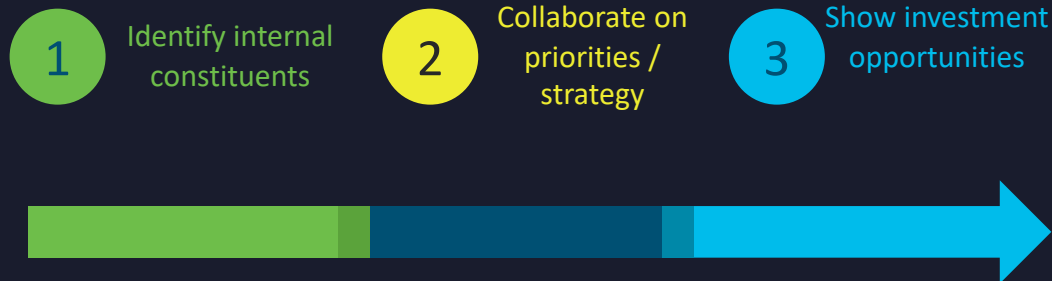

- Increased metric ingest rates for large customer deployments
- Streaming architecture analyzes data in real-time and enables rapid adjustment to changing conditions
- Reduces resource requirements for key AppD functions (baselines, metric roll-ups) & enhances scalability
- Existing integrations with IT data sources increase access to monitoring data and augment APM

Domain-Specific Machine Learning for Advanced IT Use Cases

- Real-time insights for anomaly detection, topology reconciliation, improved baselines, and intelligent alerts
 - Advanced **anomaly detection** leading to more accurate alerting
 - **Improved baselines**; stored versus calculated leading to better performance
- Accelerates AppD roadmap for **Root Cause Analysis**
 - Multivariate metric correlation driving RCA generation and recommendations
- Differentiated ML-based capabilities over APM competitors
- **Stream processing framework** will enable ML to solve additional use cases
